Projects

VIRTUAL AI ASSISTANT – Personal Project - Github repo   April 2024
- Utilized **Python** libraries to create a mini google assistant (Jarvis)
- Can perform tasks like opening system apps, web apps, set reminders, alarms, take screenshots etc.

SODA SALES DASHBOARD – Personal Project - Github repo   March 2024
- Created a dashboard with **Power Bi** to see sales of different soda brands in US
- Transformed and processed client's data by using DAX and Excel to ensure data completeness and validity
- Provided technical insights on numbers like Total revenue, sum of units sold and average per unit
- Map to see figures based on regions

COFFEE SHOP DASHBOARD – Personal Project - Github repo   March 2024
- Utilized **MS Excel** to create a fully interactive dashboard
- Performed **data cleaning** and **XLookup** to successfully identify the necessary data.
- Use of **Pivot tables, graphs and slicers** to make the dashboard

FILE EXPLORER SORTER – Personal Project - Github repo   February 2024
- Utilized **Python** and **Jypyter notebook** to create a sorter
- Sorts different files in different folders based on file type.
- Used libraries like os and shutil to create this
- Manually enter the path to where you want to sort
